**Subject:** Full 45 gallon contents unknown on Town Beach Torpoint a potential Serious PollutionThreat

Dear Milly

Further to my second call to you on this matter as you remember my contacting you approx a month ago.

As requested I am Now putting this in writing to you to put to the Council again to take urgent action before it is too late.

The Drum which was stranded on Town Beach by the Last High Water Spring Tide alongside Carew Wharf. I Observed on the last High tide that the drum was bouncing dangerously which could cause it to split resulting in the contents to spill and pollute the beach and Tamar River. Causing possible serious consequences to Residents Beach users, Visitors and Wildlife in and on the River Tamar. You had all better pray we do not have a storm before you take measures to ensure this does not happen.

The Councils Cavalier attitude to this Potential Hazard shows total dereliction of duty of care on their behalf and disregard for the safety of the public and wildlife. Which will be made public in the event of the Council facing Court Action following the spillage.
